EC 8 Duisburg Hbf – Bochum Hbf

Stop	Arrival	Departure	Platform
From Zürich HB			
Duisburg Hbf	-	17:50	12
Essen Hbf	18:01	18:03	6
Bochum Hbf	18:14	18:16	5
To Hamburg-Altona			

Good evening driver,

today, you are driving SBB's Eurocity 8 with a BR 101 on the section from Duisburg Hbf to Bochum Hbf. Due to construction works, your train will be diverted between Essen and Münster via Bochum and Dortmund, where it will make replacement stops. At Bochum, a colleague will take over the train in the direction of Hamburg-Altona. Departure is at 17:50. Have fun!

Also included is an optional PIS mod for HRR (made by Aran). It allows the EC 8 to have the appropriate train path on its displays.

The AI passenger traffic is based on a timetable from March 17, 2022, but unfortunately cannot be implemented completely realistically due to limitations imposed by the Scenario Designer.

If you don't own one of the optional add-ons, you will have to change or remove the corresponding AI trains yourself in the scenario editor.

Mandatory Add-Ons

- Hauptstrecke Rhein-Ruhr (Scenario Route)
- DB BR 101 (Player Train)

Optional Add-Ons (AI Trains)

- Schnellfahrstrecke Köln
- Hauptstrecke München - Augsburg
- Main-Spessart Bahn
- Rhein-Ruhr Osten

Freeware

- [HRR Scenario Designer Path Extension](#) v1.1
- [Recommended (Player Train)] [SBB EW IV Livery (mat0598)](#)
- [Optional] [Talent 2 VRR Livery (Foobian)](#)
- [Optional] [Talent 2 Abellio Livery (Alexander L.)](#)
- [Optional] [101 066-9 Einziganders reworked Livery (EiHowa)](#)
- [Optional] [BR 422 VRR Repaint (Nickhawk)](#)
  - HRR version
  - RRO version should not be installed so the S 6 trains have the correct livery

Install

Add the .sav file to this folder:

Documents/My Games/TrainSimWorld2/Saved/SaveGames

You can then find the scenario in the game under: Hauptstrecke Rhein-Ruhr -> Tools -> Scenario Designer -> EC 8 Duisburg - Bochum

Uninstall

Delete the .sav file.
